The Password Manager for Teams

TeamPassword is the fastest, easiest and most secure way to store and share team logins and passwords.

Get Started

Password-management startup TeamPassword uses a customized version of the MUI design system—an open-source React component library developed using Material Design used by many B2B enterprise and SaaS providers.

Manager Message

Dear friends and guests
After 20 years since faratar started working as a specialized .Net and SQLServer consulting and training center in the country, we have witnessed the maturity of the company and the provision of the most specialized practical training in all areas of the software production cycle by renowned and professional professors. Today beyond knowledge with pride ...
